CRM RELEASE

02 April 2025 - VERSION 2.25.0

New features

Enhanced Contact Notes Visibility

We know that effective communication with clients is essential, whether face to face or over the phone. To support this, we've increased the size of the contact notes section on Sales and Lettings Applicant records. This improvement reduces the need for excessive scrolling, making it easier to view and reference important information during client interactions.

Additional updates & General Improvements

We've continued to make improvements in performance and stability across the product as well as updating our help centre to be more user-friendly.
