# CRM RELEASE

30 April 2025 - VERSION 2.27.0

## **Improved EPC process**

We have improved the process for generating EPC graphs via a sales or lettings property record in CRM. This reduces the need to manually save or refresh the property record when creating an EPC graph.

## **Updates Around Marketing Toolkit**

If you'd like a demonstration of Marketing Toolkit, please let us know. Alternatively, click on the banner on your My Day page to find out more.

## **Paying Landlords**

In the Accounts module, we have aligned the process between Perform Payments and Rapid Pay when making zero value payments to landlords.

## **Menu Update**

We have updated the display for Sales-only users to reduce unnecessary menu options that were presented.

## **Additional updates & General Improvements**

We're making further improvements to enhance speed and performance. These updates are part of our ongoing efforts to ensure a smooth and responsive experience across supported platforms.
