

# Registering Client Portal Users in iamproperty CRM

This guide provides a straightforward process for registering client portal users in the iamproperty CRM, ensuring agents can seamlessly add landlords, tenants, and vendors.

By following the clear step-by-step instructions, users can efficiently add clients to the CRM Client Portals and improve overall service delivery. It is essential for those looking to maximise the functionalities of the CRM and streamline their workflow in property management.

1 In this guide we look at adding each individual user type to Client Portals separately. However, the process is identical for each user type.
