CRM RELEASE

22 June 2026 - VERSION 2.50.0

New features

Sales & Lettings

Automatic Re-Match on Price Reduction

When a property price is reduced, you'll now be prompted to resend details to applicants who were previously matched to the property.

You can choose to send to **all, some, or none** of these applicants, giving you full control while making it easy to re-engage interested applicants.

Your standard, default matching template will send, highlighting the updated price.

This helps you quickly reconnect with warm leads and maximise conversion opportunities following a price change.

Enhanced Area Unit Accuracy in Zoopla Feed

The Zoopla property feed has been updated to ensure area measurements are correctly represented when properties are configured using square metres. This enhancement applies to both Sales and Lettings properties, providing greater accuracy and consistency in property marketing data sent to Zoopla.

This ensures property sizes are displayed using the intended unit of measurement, helping to maintain accurate listing information across property portals.

Search Screen Preferences Now Persist

Grid preferences are now remembered across the following search screens:

- Lettings Properties
- Landlords
- Tenants
- Lettings Applicants
- Contractors
- Guarantors
- Sales Properties
- Vendors

- Sales Applicants
- Solicitors
- Sales Compliance

Any column sorting, positioning, or arrangement applied within the grid view will now be retained when the page is refreshed or revisited.

This means you can tailor each search screen to the way you work and return to the same familiar layout every time, saving time and providing quicker access to the information that matters most.

Sales

Enhanced Filtering On Applicant Viewings

Within Sales > Applicants > Applicant Record > Viewings, you can now filter viewing records using specific keywords or phrases. This makes it easier to quickly locate relevant viewing activity, feedback, and notes without having to manually review the entire history.

By helping you find the information you need faster, this enhancement streamlines applicant management and saves valuable time when preparing for follow-up conversations.

Updates and refinements to the new Calendar v2

Following the recent launch of **Calendar v2**, several updates have been introduced based on user feedback to enhance usability and overall experience.

This release includes

- We've improved the Calendar view on mobile including updates to the scrolling, change to horizontal/vertical navigation, using the full height of device screens and ensuring that navigation is user friendly.
- Viewing notes on Open House viewings are retained
- Improving the use of merge fields when sending e-mail from the calendar.

As a reminder, you'll see the option to use the new calendar & you can read about the changes below.

Toggle calendar on/off

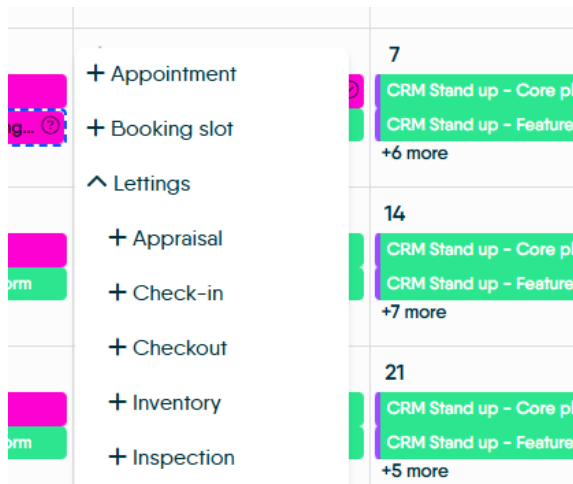

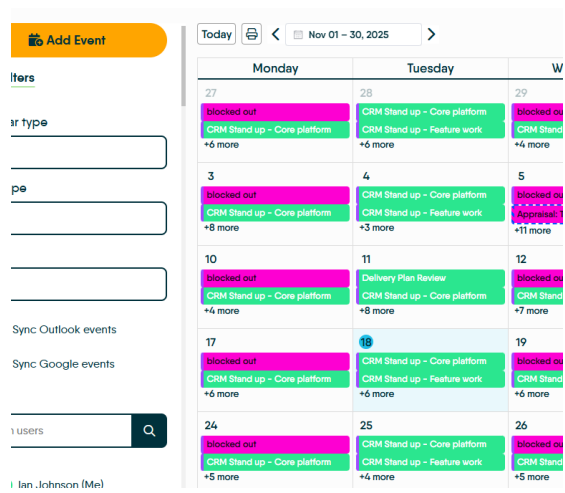

Once we've turned the new calendar on, you'll see a new toggle at the top of the calendar screen showing 'New Calendar'

By toggling this on or off you can switch between the new calendar and the existing as you become familiar with the new version.

NOTE: The on/off toggle is persistent across sessions

Calendar UI

The change to UI within calendar means it now aligns with the rest of iamproperty CRM. All of your existing functionality remains, just with a fresh new look.

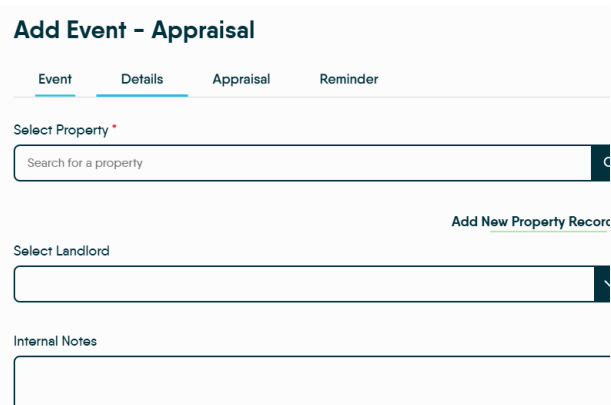

Appointment layout

Changes have been made to the appointment layout, so it is easy to see the Event, details, appointment specific information (viewing/appraisal etc.) and any reminders.

When using the Add new records functionality this will open using the Core Process Simplification journey.

Adding viewings/appraisals

Adding an appraisal works in the same way as existing functionality (right click and add or using the menu on the left)

Changes To Renters Rights

With the recent changes to Renters Rights, we've created a helpful article which details more about what this means to you, and how you can use iamproperty CRM to help navigate these changes. All of the information can be found [here](#).

Book a CRM Health Check

Did you know you can book a free CRM review with our team? We'll walk through how you are currently using the system and share practical tips, guidance and best practice to get the most from your CRM.
