CRM RELEASE

28 October 2026 - VERSION 2.57.0

Enhanced Property Page

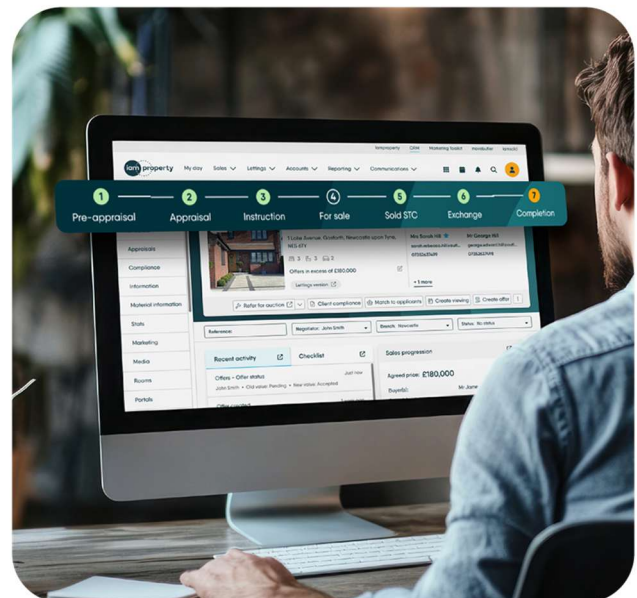

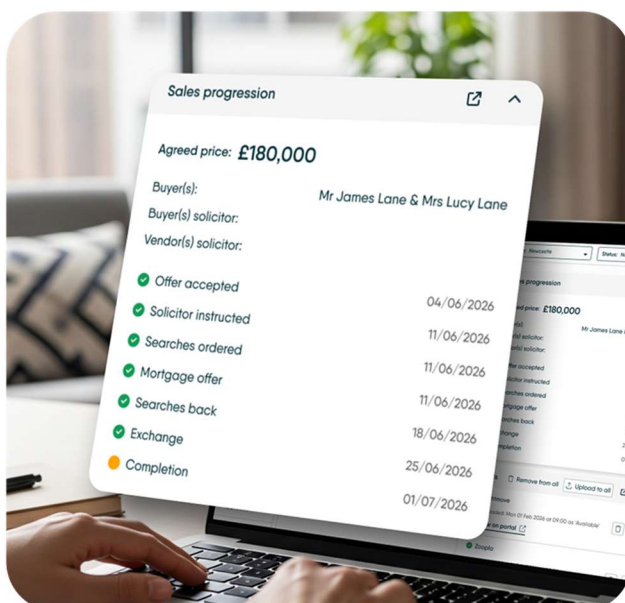

It's now quicker and easier to find the data and actions you use most in CRM.

Our enhanced Property Overview Page brings relevant essential information and activity directly to your property header. Available across Sales and Lettings, track your property's progress and easily access milestone information to guide you through your next steps.

Property Milestones

The whole property journey at a glance

A new milestone header gives you a clearer view of where each property is in its lifecycle from pre-appraisal through to completion or let and beyond.

Property Overview

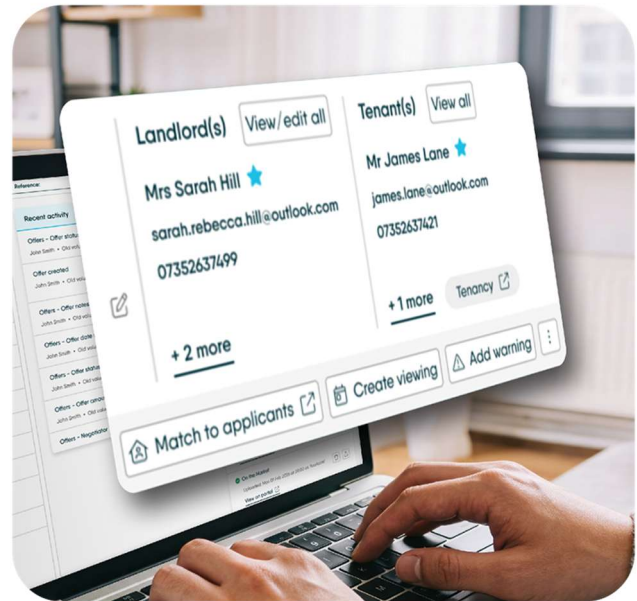

See what matters most, when it matters

Your Overview Page adapts as your property moves through each stage of its lifecycle, automatically bringing the most relevant information and actions to the forefront. For example, when a property reaches sold STC, the focus shifts to sales progression, while for lettings, Property Management (inc. Accounts, Maintenance Jobs & Inspections) becomes more prominent once a property is let.

Property Header

Get where you need to be with fewer clicks

With direct access from the property header to your vendor or landlord records, you can reach the information you need, when you need it. Jump straight from the overview into key areas such as advertising status, journey progress and current sales or rental price.

Enhanced Property Pages are available now

Changes To Renters Rights

With the recent changes to Renters Rights, we've created a helpful article which details more about what this means to you, and how you can use iAmProperty CRM to help navigate these changes. All of the information can be found [here](#).

Book a CRM Health Check

Did you know you can book a free CRM review with our team? We'll walk through how you are currently using the system and share practical tips, guidance and best practice to get the most from your CRM.

Book your health check today and make sure you are fully prepared to support your clients. Email us at crm.accountmanagement@iamproperty.com
